## Propane Griddle Operating Instructions

1. Ensure all three burner knobs located on the right side of the griddle are in the "OFF" position (horizontal)
2. Ensure that the propane tank is properly connected
3. Turn the propane on at the source **SLOWLY** and wait 2 minutes before ignition. Failure to wait may cause the safety device in the cylinder valve to activate which will reduce the flow of gas to the cylinder
4. Turn the back burner knob  $\frac{1}{4}$  turn to start the flow of gas
5. Hold the lighter or long match to the burner to ignite
6. Repeat steps 5 and 6 for the middle and front burners

### To turn OFF the Griddle

1. Turn propane "OFF" at the tank to extinguish the griddle
2. Turn all burners to the off position
3. **CAUTION** the top of the griddle may remain hot up to **ONE HOUR** after turning the griddle off
